accessories & mounting

4U2SEE Displays not only attract attention, they offer several features making them easy to use and implement in your business. From convenient power supply options to easy software options for updating your sign, 4U2SEE Displays offer everything you want and need for your new sign. Your local dealer can assist you in choosing the accessories that are best for you.

updating your display

4U2SEE Displays feature two methods for updating and communicating with your display—our convenient handheld remote controller and our simple SIGMA 3000 computer software. Either method allows you to easily create messages and manage your display.

HANDHELD REMOTE CONTROLLER

4U2SEE makes programming your sign as easy as using your television's remote control.

Our handheld remote control puts the power of your sign at your fingertips. Using our handheld remote, you can:

- Use the convenient remote to power your sign on and off.
- Add and edit text, controlling the speed and look of your message.
- Choose message display order.
- Control day, time, week and time zone of the display.

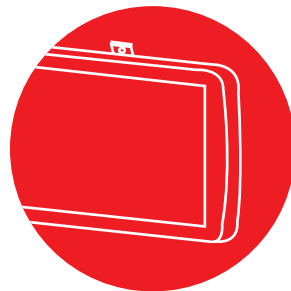

SIGMA 3000 SOFTWARE

The SIGMA 3000 display management software comes optional with all 4U2SEE Displays. With SIGMA 3000 software, you can easily:

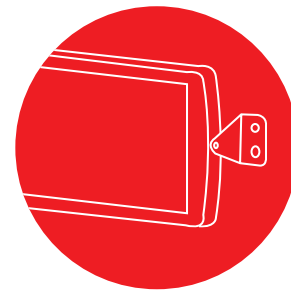

- Create and edit messages.
- Set play mode, color and speed.
- Manage messages, set up your message download display schedule.
- View messages before sending them to the sign with the simulator.
- Manage system configurations and send messages to the sign.
- Save messages and schedules for future use—no need to recreate over and over.

mounting options

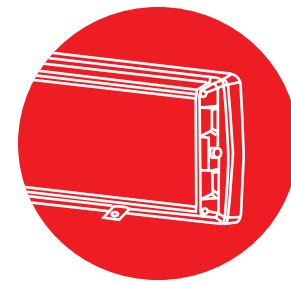

Choose from three easy standard mounting options* or ask about our custom mounting options.

HANGING MOUNT

SIDE MOUNT

SITTING MOUNT

* Only standard for the one and two line signs. The four line sign is only available with a hanging mount.
